

Pioneering the Future  
of Energy in Libya

# ◆ OUR MISSION

## Made by Libyans, for Libya

We contribute to Libya's industrial growth and energy security. Through advanced technologies and strong global partnerships, we are committed to the highest standards of:

Engineering Quality

Operational Excellence

Safety & Integrity

Environmental Responsibility

Economic Value

# ◆ Strategic Objectives

The refinery project is built upon a clear strategic vision: maximizing the added value of Libya's oil wealth by establishing and operating a modern refinery in accordance with the highest international standards for operational efficiency, safety, and environmental sustainability.

## × Supporting the National Economy and Attracting Investment

The project aims to attract both local and foreign investments while transferring and localizing advanced refining technologies. Furthermore, it seeks to provide high-quality job opportunities that contribute to the development of local communities and stimulate economic activity on a national scale.

## × From Crude Oil to High-Value Products

Converting crude oil into sophisticated petroleum products—including Gas (LPG), gasoline, jet fuel, diesel and Liquefied Petroleum —is a fundamental pillar for increasing economic returns. The project targets:

Meeting local market demand.

Reducing reliance on imports.

Exporting surplus products to regional and international markets to achieve returns that significantly exceed those generated by the sale of raw crude.

## × The Opportunity: The Numbers Speak

Libya's annual consumption of petroleum products reaches approximately 17 million tons, at a cost exceeding 13 billion USD. This figure clearly highlights the scale of the available opportunity. Developing modern refining capacity is essential for:

Achieving self-sufficiency.

Strengthening energy security.

Driving sustainable economic growth.

# ◆ OUR VISION

## At the forefront of Libya's private energy sector

Muheet Oil Refining Co. stands at the forefront of Libya's private energy sector as one of the pioneering locally owned company focused exclusively on refinery development. We combine national ownership with disciplined international engineering, delivering projects that meet globally recognized standards.

- ✕ Process Design
- ✕ Engineering
- ✕ HSE
- ✕ Environmental Performance

# Our People

The dedicated professionals driving Muheet's vision forward.

# ◆ Leading Environmental Performance

**Setting new standards for environmental responsibility in the energy sector**

- ✗ Operating with the lowest emissions intensity in the regional refining sector through continuous process optimization.
- ✗ Maintaining air quality standards %20 below regulatory limits through advanced emission control technologies .
- ✗ Protecting marine ecosystems with zero discharge water treatment systems and coastal monitoring programs .
- ✗ Preserving 1,000+ hectares of natural habitat through our biodiversity offset and conservation initiatives .
- ✗ Conducting quarterly environmental audits and publishing results with full transparency to stakeholders .

# Refinery Configuration & Refining Capacity
